## EDUCATION

### Bachelor of technology, CSE

Vellore Institute of Technology, Vellore

06/2018 - Present,

CGPA=7.81

### Class XII

Lord's International School (Alwar)

04/2016 - 03/2017,

Percentage= 72%

## PROJECTS

### Review System Using Opnion Mining

- Worked as frontend and backend developer. We made E-Commerce website with review system using postman API. At backend we used languages like Python, Ajax, PHP and JavaScript..

### Expansely (the Expanse Tracker)

- In this project we made a website in which user can track his income and expenses. We have used Reactjs for building the frontend of the website and also for the better user experience we have used chart.js library so that user can visually see his expense and income usage chart, and we have also added the function of speak i.e. user can also handle this web page by only his voice this we have done by using speechly library , it is the fast, accurate and simple voice interface API for web.

### Online Store with payment gateway using ReactJs

- Worked as frontend and backend developer. To test our knowledge and skills attained, we made E-Commerce website. For frontend, we used major libraries of ReactJs. For backend, we worked with commerce.js. For payment gateway, we used Stripe API.

### Git-Hub Visualizer

- As a data visualization project, we made a website where we can search Github users and display useful info like amount of repos, list of followers, most starred repo and amount of programming language used overall. We used React hook to set up pages and navigation and fusion charts to display visualised data. We have charts, search bar and other analysed data on homepage

## Programming SKILLS

HTML

CSS

JavaScript

Java

SQL

PHP

## Frameworks / Systems

ReactJs

Bootstrap

Sass

Jquery

Ajax

Firebase

Node Js
